Education

University of Toronto

Master of Applied Science, Mechanical Engineering

Toronto, Canada

Sep. 2018 - Expected Sep. 2020

Specialization Deep Reinforcement Learning, Machine Learning, Mobile Robotics

University of Toronto

Bachelor of Applied Science, Mechanical Engineering

Toronto, Canada

Sep. 2013 - Apr. 2018

Specialization Robotics and Mechatronics Minor; GPA (3.81/4.00); Dean's Honor List for all terms

Experience

Autonomous System and Biomechatronics Lab

Researcher, Master Thesis

Toronto, Ontario

Sep. 2018 - Present

- **Autonomy** Designed a mobile robot platform for urban search and rescue in ROS and C++
- **Machine Learning** Developed a deep reinforcement learning network and virtual-to-real transfer pipeline in Pytorch
- **Localization** Implemented lidar and vision based SLAM for real time pose estimation
- **Control** Optimized a robust motion controller for rough terrain navigation
- **Deployment** In house system level testing with autonomous point to point navigation

aUToronto - SAE AutoDrive Challenge (2018 and 2019 Winner)

Planning and Control Team

Toronto, Ontario

Sep. 2018 - Oct. 2019

- **Autonomy** Developing a level 4 autonomous vehicle using ROS and C++; within a team of 30+ students
- **Localization** Implemented real-time kinematic GPS for precision localization
- **Planning** Optimize trajectory planner for real time performance
- **Simulation** Evaluation of planning and control system using kinematics and dynamics model

Toward Smart Cities: Road Accident Prevention

Developer, Course Project

Toronto, Ontario

Sep. 2018 - Dec. 2018

- **Smart City** Data-driven accident prediction using Scikit-learn in Python; within a team of 5 students
- **Data Engineering** Data collection, visualization, feature engineering, and negative sampling
- **Machine Learning** Trained and benchmarked 3 supervised learning models: Random Forest, SVM, and Deep Neural Network

Autonomous Turtlebot

Developer, Course Project

Toronto, Ontario

Jan. 2018 - Sep. 2018

- **Mapping** Developed robot coverage and exploration algorithm using ROS and C++
- **Computer Vision** Object detection and identification using OpenCV library
- **Social** Implemented person-following and emotional model for human-robot interaction

Autonomous Maze Navigation Rover Design

Developer, Course Project

Toronto, Ontario

Sep. 2017 - Dec. 2017

- **Autonomy** Implemented localization, collision avoidance, and path planning algorithm in MATLAB and Arduino
- **Control** Designed architecture for autonomous payload pick-up and delivery in a maze

Conavi Medical - Novasight Hybrid System

Mechanical Engineer Intern

Toronto, Ontario

May. 2016 - Aug. 2017

- **Research** Investigated potential design hazards and risks of catheter rotary assembly
- **Manufacturing** Streamlined an efficient assembly and calibration work instruction
- **Organization** Established an inventory system with full traceability for FDA 510k submission validation
- **Project Management** Directed technical design reviews with senior leadership; accelerated the exit of the project phase

Honors & Awards

2018	Best Undergraduate Poster Presentation , CFD Society of Canada	Winnipeg, Manitoba
2015	University of Toronto Excellence Award , University of Toronto	Toronto, Ontario
2015	Shell Canada Limited Engineering Scholarship , University of Toronto	Toronto, Ontario
2015	Best Innovation Award and Best Prototype Award , U of T Engineering Competition Junior Design	Toronto, Ontario
